

Dongguan Yisong High Technology Co., Ltd

Automatic PVC Die Sawing Machine for plastic die & acrylic die & wooden die die board max thickness can be 8mm

Without using laser
Automatic Die Saw System

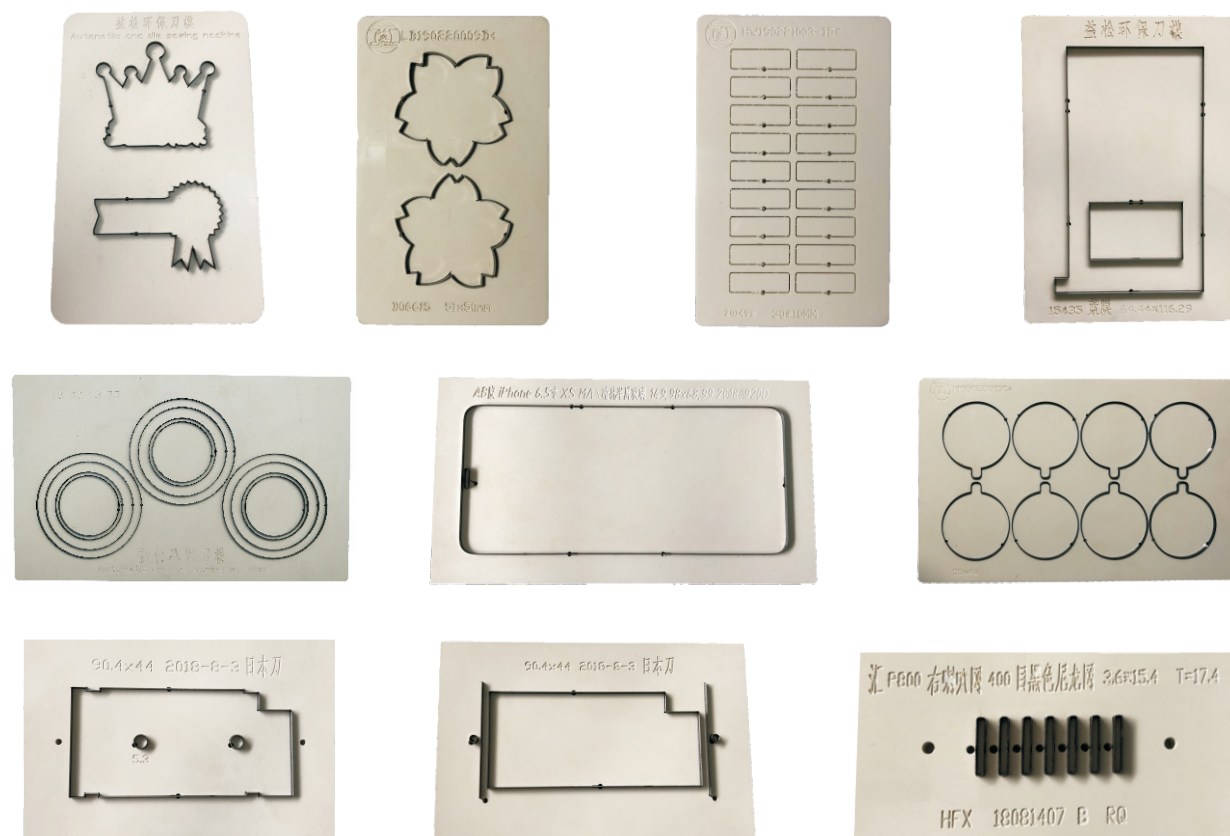

- Vertical die's kerf and tight cutting tolerance ± 0.05 mm
- Perfect smoothness of die board, more time-saving to set up the die cutting machine
- Better dies' blade holding, more durable lifespan for die cutting
- Clean die without any black laser burnt edge
- The cutting rule is not easy to get rusted
- Cutting effect of half-bridge is good
- No Corrosive laser fume problem, protect machine from being rusted, eco-friendly
- Mutil-functions with milling & drilling tools, can also handle positioning holes etc.
- No burning flame, production security guaranteed

For Label Dies & Electronic Dies
New-technology Patented Automatic Die Sawing System

Machine Specifications

Machine name	Automatic CNC PVC Die Sawing Machine
Max cutting board size	600mmx600mm
Max cutting thickness	<8mm (PVC, acrylic, plexiglass, plywood etc)
Saw Cutting tolerance	± 0.05 mm
Perpendicularity of saw cut	$\leq 0.1^\circ$
Repeatable sawing tolerance	$\leq \pm 0.01$ mm
Sawing speed	0~600mm/min adjustable
Milling speed	0~200mm/min adjustable
Kerf width	0.45mm, 0.53mm
Computer operation table size	L600*W550*H1380mm
Machine size	L2215*W1712*H1675mm
Machine weight	2200 KGS
Machine driven system	Servo motors, guide rails, Screw shaft
Cutting tools	Sawing blade, milling tool, drilling tool
Machine power supply	380V/1000W (energy saving mode can be customized)
Air pressure	0.6-0.8 MPa
